Tried&Tested provides...

- DoubleTest™ kits to test entire crew and all passengers
- a DoubleTest™ kit comprises:
- either, 1 rapid antibody test and 1 rapid antigen test
- or, 1 rapid antibody test followed by a 2nd rapid antibody test to confirm 1st result
- DoubleTest™ gives minimum 99.98% accuracy, see protocol below
- both tests will come with: CE mark | FDA EU authorisation | MHRA registration
- your own nurses conduct tests, package includes training for them by our CQC registered COVID-19 Antibody Testing Training Course
- or we can provide our nurses at extra cost
- package includes CQC registered COVID-19 Antibody Testing Training Course
- also available, temperature sensing option (at extra cost)
- optional blockchain protected health passport app (at extra cost)

Protocol

- Antibody test is taken first. Finger-prick blood test. **No machine or lab required.**
- 4 possible outcomes A | B | C | D
- Outcome A. IgG antibodies present. Take second antibody test
- If 2nd test shows antibodies, then with 99.9831% confidence, **health status green**
- Outcome B. IgG AND IgM present. Take antigen test
- Outcome C. IgM ONLY present. Take antigen test
- Outcome D. No IgM or IgG. Take antigen test
- Antigen test. **Saliva only. No machine or lab required.**
- 2 possible outcomes E | F
- Outcome E, no current infection, **health status green**
- Outcome F, current infection, with 100% confidence, **health status red, self isolate**
